Efficiency + Effectiveness

ONLINE
ISO 9001:2015 RISK-BASED
PLANNING COURSE

February 13, 20, & 27, 2021
Saturday/ 9am-5:00pm
Via Zoom

Rationale:

Risk-based thinking is presented within the introduction of the ISO 9001:2015 standard. A risk is a positive or negative deviation from the expected. Addressing a risk could mean pursuing a new opportunity. The better your organization manages risks, the better prepared you are to face uncertainties. Organizations are required during planning of their quality management system to address both risks and opportunities. Opportunities can include the adoption of new customers, products, technology or practices.

In effect, 9001:2015 risk management requires the organization to plan and establish an end-to-end process for risk management and then to execute that process consistently, carefully and widely.

This course is intended to equip ISO 9001:2015 risk-based planners to conduct strategic and operational planning based on identified risks and opportunities of the organization.

It is in this context that the ISO 9001:2015 Risk-Based Planning Course is being offered as a key initiative of the e² Consulting Inc. - Efficiency + Effectiveness.

It is intended to provide a course to professionals who want to enhance their skills on structured methodology to conduct a risk-based strategic and operational planning of the organization.

It is a 24-hour course program focuses on the fundamental knowledge, and skills necessary to conduct a risk-based strategic and operational planning with the use of its principles, practices, tools, and approaches that will result to effective planning of the organizations.

The course includes online workshops to prepare you for real-life planning situations including planning process and complete templates for reporting. It is also competency based and will incorporate online discussions, instruction, and exercises, and cases.

Course Objectives:

At the end of the course, the participants will be able to:
