**ONLINE ISO 9001:2015 QMS
IMPLEMENTATION & CONTROLS COURSE**

April 10, 17, 24, 2021
Saturday/ 9am-5:00pm
Via Zoom

Rationale:

The benefits of implementing a Quality Management System (QMS) which is compliant with ISO 9001:2015 can be far-reaching. Simply adopting a process approach to operations can immediately highlight areas for improvement. Documenting processes in a meaningful way can also help with communicating quality actions and strategy to people at all levels. Inductions and training are linked directly to business objectives and people within the organization are clear on their contribution to overall performance and success.

Adopting a customer focus adds value for customers and is likely to enhance their satisfaction and loyalty. Not only can a QMS enhance your customers' satisfaction, but it will also have a positive impact on your reputation. Having a certified QMS can open doors to a range of contract opportunities and therefore potentially boost your revenue and market share.

Implementing a QMS can also help you to be more efficient. Using resources, this includes people, materials, time, money and external partners and suppliers, as effectively and efficiently as possible has a direct positive impact on profitability.

Involving the people within your business fosters deeper engagement with operations. This can lead to reduced turnover of staff, better productivity, enhanced trust and collaboration and a skilled and happy workforce.

Consistent and predictable outcomes lead to greater understanding of capability and capacity. Understanding organizational capability and capacity can help you to manage growth and the associated risks. *Source: NQA-ISO-9001-Implementation-Guide*

It is in this context that the ISO 9001:2015 QMS Implementation & Controls Course is being offered as a key initiative of the e² Consulting Inc. - Efficiency + Effectiveness. It is intended to provide a course to professionals who want to ensure their reasons for implementing a QMS are aligned with their strategic direction and sustainable.

It is a 24-hour online course program focuses on monitoring and measuring activities regularly to ensure that the organization is monitoring and measuring the right things and provide them with useful business intelligence that can inform the way they operate.

The course is competency based and will incorporate online discussions, instructions, workshops, and exercises.

Course Objectives:

At the end of the course, the participants will be able to:

- Determine the needs and methods to monitor, measures, analyze, and evaluate results of QMS implementation.
-

- Establish and implement appropriate analysis and evaluation methods on the results of QMS implementation.

Course Outline:

- The Need and Determination of Methods to Monitor, Measure, Analyze, and Evaluate Results of QMS Implementation
- Establishing Analysis and Evaluation Method on Conformity of Products and Services
- Establishing Analysis and Evaluation Method on the Degree of Customer Satisfaction
- Establishing Analysis and Evaluation of Method on Achievement of Quality Objective or Key Performance Indicator Targets
- Establishing Analysis & Evaluation Method on the Effectiveness of Actions Taken to Address Risks and Opportunities
- Establishing Analysis and Evaluation Method on the Effectiveness of Actions to Acquire Necessary Competence of Personnel
- Maintaining Operation/Office Infrastructure/Equipment
- Maintaining Working Environment or Good Housekeeping/5S
